

STATISTICAL SUMMARIES OF STUDENT TEACHING EVALUATIONS

Below I have recorded the standard deviation (SD) as well as the mean and median (MDN) scores for students' responses to the following two survey questions from the "Faculty Evaluation Sheet":

- Q10: "(Course) Give the course an overall grade."
- Q11: "(Instructor) Grade the instructor for his/her overall conduct of the course."

The scale is from 1 to 5, with '1' being the most favorable response and '5' being the least favorable response. No comparisons are made with averages for CLAS or philosophy faculty on the whole, because, after making inquiries with Steve Miller (Office of University Evaluation) and Dean McCoy (University Testing Services), I discovered that no such data is collected.
