

GLENN HACKBARTH

PASSAGE

(1991)

for
Piano, Percussion and Electronic Tape

•PERCUSSION INSTRUMENTS•

Percussion mallets should be chosen using the following guidelines: Crotales are always played with very hard mallets. Toms should be played with medium hard to hard mallets, the resulting sound being tight with little lingering resonance. Cymbals and tam-tam are to be played with medium soft mallets, marimba with medium hard mallets, and vibraphone with medium hard mallets in the first section and soft to medium soft mallets in the slow sections (mm. 158 to end). In some cases this will require the performer to hold two mallets of differing hardnesses in each hand (the very beginning, for example, requiring hard mallets for the crotales and toms as well as softer mallets for the cymbals and tam-tam).

•SPECIAL PERFORMANCE NOTES AND INDICATIONS•

piano/perc: All grace notes precede the beat (i.e. the following, regular note occurs precisely where it is metrically indicated).

piano/vibes: "Ped. down to m.14, etc." indicates that the sustain pedal remain down until the downbeat of the specified measure. There should be no re-pedalling during the measures specified.

piano m.2: Slashed noteheads indicate playing clusters on the strings inside the piano with the palms of the hands. The precise pitches covered are not important but reflect a non-overlapping "high" and "low" area on the lowest strings of the piano.

piano m.151: Chromatic cluster performed on the keys.

piano m.169: "+" indicated pitches to be plucked on the strings inside the piano.

perc. m.179: During the section beginning with this measure the percussionist plays a repeated ostinato figure at the indicated tempo. In (approximately) m. 184 the ostinato is expanded into a new group of pitches which contain the low F#, G, and Ab in addition to the original set. In m.189 the ostinato is again expanded, adding D and Db to the group established in m.183. The B natural bell in m.195 of the tape part cues the percussionist to begin the precise sequence in m.195. The pianist follows the percussion part as indicated.

piano mm.180-193: Use tape cues as guides for approximate placement. Piano part should be played with rubato/freedom and should not be viewed as having to coincide rigidly with vibe ostinato.

perc. m.205: Tam-tam swell into downbeat of m.206 should be about 2" long. Downbeat of m.205 cued by tape attack on low C. The following tam-tam swells should be similarly played.

•SETUP AND AMPLIFICATION•

The piano should be placed in its traditional stage left (viewed from the audience) position and the percussion, stage right. Both the piano and the percussion must be amplified. It is recommended that a single boom mike be suspended over the piano sounding board area and that both the vibes and the marimba have separate microphones. These three microphones should be routed to a mixer as three of the input channels. The outputs from the tape playback should be routed to two other input channels on the mixer. The mixer output should then be routed via an amplifier to the main stage speakers. Since the tape levels can be quite high, these speakers must be large, high quality units intended for hall sound reinforcement. Speaker placement should be far enough forward (toward the audience) to avoid feedback from the microphones. It is also recommended that the performers have separate monitor speakers over which the tape (only) part is played. This will insure that the performers can clearly hear the tape since the main speakers are ideally placed in front of them.

Playback level of the tape should be set so that the first section is powerful with the piano and percussion in constant competition.

•PROGRAM INFORMATION•

Passage was written for pianist Caio Pagano and percussionist J.B. Smith and premiered in March, 1991. Cast in two large sections, the first portion presents a toccata-like fabric in which thematic modules are juxtaposed in a manner loosely resembling a rondo. Following a minimalistic tape interlude, the second section gradually establishes a relaxed, floating ostinato over which thematic material from the first section reappears transformed in content and placed into continually changing contexts. Although this composition does not represent any major stylistic departure from my other works, it is perhaps the one which most clearly alludes to my earlier involvement in jazz, primarily in the tape sounds and overall rhythmic style of the first section. It is also the only composition of mine to date which quotes another work: the final piano figures presenting a mutated reference to Alban Berg's *Four Songs, Opus 2, No. 4*.

Glenn Hackbarth was born in Milwaukee, Wisconsin. Following an early training in jazz, he received degrees in music from the University of Wisconsin and the University of Illinois, where he studied composition with Herbert Brun, Ben Johnston and Edwin London. In 1976 he moved to Phoenix to join the faculty at Arizona State University where he is currently the director of both the New Music Ensemble and the Electronic Music Research Studios as well as resident artist with the university's Institute for Studies in the Arts. The recipient of grants and awards for musical composition from ASCAP, the Arizona Arts Commission and the National Endowment for the Arts, he has composed for a large variety of instrumental combinations in both the acoustical and electronic mediums. His music is available on the Crystal, Access and Orion labels.

Tape

This musical score section for measures 116 consists of three staves. The top staff is for 'Tape' and features two systems of music. The first system is in 3/4 time with a treble clef, and the second is in 4/4 time with a treble clef. The middle staff is for 'Piano' and shows a continuous line of sixteenth-note chords. The bottom staff is for 'Perc' (percussion) and contains eighth-note patterns. Large, curved black arrows above the piano and percussion staves indicate a dynamic transition from forte to piano.

Tape

125

This section spans measures 122 and 125. It includes four staves: 'Tape' (top), 'Piano' (second from top), 'Perc' (third from top), and 'marimba' (bottom). The 'Piano' and 'Perc' staves begin with a forte dynamic (f) and then transition to piano dynamics (p, mf, sfz). The 'marimba' staff starts with a piano dynamic (p) and then moves to forte dynamics (mf, sfz, sfz, sfz, p). Measures 122 and 125 feature complex rhythmic patterns with various time signatures (3/4, 4/4, 5/4, 6/4, etc.) indicated by changes in the bar lines.
