

III. Support for Training of Students in Biotechnology-Related Areas at Arizona State University

Support for Undergraduates:

Undergraduate research enrichment program

<http://lifesciences.asu.edu/ubep/text/research.htm>

Summer Undergraduate Research Program in Photosynthesis funded by the National Science Foundation

<http://photoscience.la.asu.edu/photosyn/reu.html>

Support for Graduate Students:

Energy Transduction Mechanisms (Molecular and Cellular Biology; Chemistry and Biochemistry; Plant Biology) funded by the National Science Foundation

<http://photoscience.la.asu.edu/photosyn/grt.html>

Graduate Education at the Interface between Biology, Chemistry, Biophysics, and Engineering funded by the National Science Foundation

<http://photoscience.la.asu.edu/rtg/default.html>

Integrated Graduate Education and Research Training (IGERT) Program on Musculoskeletal and Neural Adaptations in Form and Function funded by the National Science Foundation

<http://www.eas.asu.edu/~bme/> (Click on Graduate Program or IGRET Award).

Research Assistantships and Teaching Assistantships These forms of support are available from the individual departments.
