Assignment #3: Research report analysis

Select three research reports published in a journal and identify the following for each reading:

1. What is the problem being investigated?
2. Identify the organizing structure or paradigm (qualitative, quantitative, or both)
3. List the hypotheses (or objectives if hypotheses are not included).
4. What are the independent and dependant variables (or key issues investigated)?
5. Were the hypotheses, or objectives, and variables clearly identified? (Do you know exactly what was being investigated)?
