ASSIGNMENT #8: OBSERVATION DESIGN

Working in teams of three:

· Select an event, behavior setting, activity, or other definable people-space-object interaction.

· Identify the relevant sampling dimensions (places, time, person, age range, gender, activity, etc.).

· Develop a "map" of the space or zone for observation.

· Develop an observation log on which to record data.

· Do a trial observation and collect the data; be prepared to summarize it and talk about how you would use the data in design.
