Assignments#12: Validity and reliability.

Select a research paper that you have read, or that you read, for this assignment, and:

1. Summarize the reliability of the research instrument as described in the paper or based on your own interpretation from the discussions in the paper.

2. List the key aspects of reliability (a re-visit of our discussions for session #12) as they may relate to the paper that you read.

3. Summarize the validity of the research instrument as described in the paper or based on your own interpretation from the discussions in the paper.

4. List the key aspects of validity (a re-visit of our discussions for session #12) as they may relate to the paper that you read.

5. Summarize how you should use reliability and validity in traditional research. Be specific and brief!

Spend time as a team of three to briefly review what each of you have done. Fine tune your responses to the above questions after the team session. Present at next class as team of three.
