## Research Vision

I investigate collective behavior in living systems by integrating empirical data with concepts and methods from statistical physics, dynamical systems, and model selection. Working closely with broad-minded collaborators — willing and excited by the prospect of exploring new ideas and solving hard problems — I seek to discover the computational logic of adaptive collective systems.

## Education

- 2005–2010 **Cornell University** *Ph.D., Theoretical Physics*  
Dissertation: *Robustness and Evolvability in Systems Biology and Plectoneme Formation in DNA Supercoiling.*
- 2001–2005 **Ohio Wesleyan University** *B.A., Physics, Summa cum laude*

## Academic Positions & Fellowships

- 2015–present **ASU–SFI Center for Biosocial Complex Systems**  
*Assistant Research Professor (2017), Postdoctoral Fellow (2015),*  
Arizona State University and Santa Fe Institute
- 2019–2020 **Berlin Institute for Advanced Study**  
*Fellow, College for Life Sciences*
- 2012–2015 **Center for Complexity and Collective Computation**  
*Postdoctoral Fellow, University of Wisconsin–Madison*  
*Mentors: Jessica Flack and David Krakauer*
- 2010–2012 **Santa Fe Institute**  
*Postdoctoral Fellow*  
*Mentors: Jessica Flack and David Krakauer*
- 2005–2010 **Cornell University**  
*Graduate student, Laboratory of Atomic and Solid State Physics*  
*Advisor: James Sethna*
- 2009 **Los Alamos National Laboratory**  
*Graduate Research Intern, Center for Nonlinear Studies*  
*Mentor: Ilya Nemenman*
- 2006 **Indiana University**  
*IGERT Fellow, Cognitive Science Department*  
*Mentor: Randall Beer*

---

## Honors & Awards

- 2019 Fellowship in College for Life Sciences, Berlin Institute for Advanced Study
- 2016 Travel Award, q-bio Program Committee, sponsored by NSF
- 2016 Shirley Chan Travel Award, Div. Biological Physics, American Physical Society
- 2014 Finalist, Burroughs Wellcome Fund Career Awards at the Scientific Interface
- 2005–2007 IGERT Fellowship in Nonlinear Systems
- 2005 Phi Beta Kappa
- 2005 Rusk Prize in Physics
- 2005 Sigma Xi Research Award

---

## Publications

- *Quantifying the impact of network structure on speed and accuracy in collective decision-making.*  
Bryan C. Daniels and Pawel Romanczuk.  
Theory in Biosciences (in press).
- *Quantifying dynamical high-order interdependencies from the O-information: An application to neural spiking dynamics.*  
Sebastiano Stramaglia, Tomas Scagliarini, Bryan C. Daniels, and Daniele Marinazzo.  
Frontiers in Physiology **11**, 595736 (2021).
- *Scaling theory of armed conflict avalanches.*  
Edward D. Lee, Bryan C. Daniels, Christopher R. Myers, David C. Krakauer, and Jessica C. Flack.  
Phys. Rev. E **102**, 042312 (2020).
- *Tyramine and its receptor TYR1 linked behavior QTL to reproductive physiology in honey bee workers (Apis mellifera).*  
Ying Wang, Gro V. Amdam, Bryan C. Daniels, and Robert E. Page, Jr.  
Journal of Insect Physiology **126**, 104093 (2020).
- *Individual and collective encoding of risk in animal groups.*  
Matthew M. G. Sosna, Colin R. Twomey, Joseph Bak-Coleman, Winnie Poel, Bryan C. Daniels, Pawel Romanczuk, and Iain D. Couzin.  
Proc. Natl. Acad. Sci. USA **116**, 20556 (2019).
- *Automated, predictive, and interpretable inference of Caenorhabditis elegans escape dynamics.*  
Bryan C. Daniels, William S. Ryu, and Ilya Nemenman.  
Proc. Natl. Acad. Sci. USA **116**, 7226 (2019).
- *Convenient Interface to Inverse Ising (ConIII): A Python 3 package for solving Ising-type maximum entropy models.*  
Edward D. Lee and Bryan C. Daniels.  
Journal of Open Research Software **7**, 3 (2019).

- *Network Analysis for the Digital Humanities: Principles, Problems, Extensions.*  
Deryc T. Painter, Bryan C. Daniels, and Jürgen Jost.  
*Isis* **110**, 538-554 (2019).
- *Criticality distinguishes the ensemble of biological regulatory networks.*  
Bryan C. Daniels, Hyunju Kim, Douglas Moore, Siyu Zhou, Harrison Smith,  
Bradley Karas, Stuart A. Kauffman, and Sara I. Walker.  
*Phys. Rev. Lett.* **121**, 138102 (2018).
- *Locating decision-making circuits in a heterogeneous neural network.*  
Emerson Arehart, Tangxin Jin, and Bryan C. Daniels.  
*Frontiers in Applied Mathematics and Statistics* **4**, 11 (2018).
- *Collective memory in macaque conflict implied by temporal scaling collapse.*  
Edward D. Lee, Bryan C. Daniels, David C. Krakauer, and Jessica C. Flack.  
*J. Royal Society Interface* **14**, 20170223 (2017).
- *Dual coding theory explains biphasic collective computation in neural decision-making.*  
Bryan C. Daniels, Jessica C. Flack, and David C. Krakauer.  
*Frontiers in Neuroscience* **11**, 313 (2017).
- *Control of finite critical behaviour in a small-scale social system.*  
Bryan C. Daniels, David C. Krakauer, and Jessica C. Flack.  
*Nature Communications* **8**, 14301 (2017).
- *Quantifying collectivity.*  
Bryan C. Daniels, Christopher J. Ellison, David C. Krakauer, and Jessica C. Flack.  
*Current Opinion in Neurobiology* **37**, 106 (2016).
- *Automated adaptive inference of dynamical phenomenological models.*  
Bryan C. Daniels and Ilya Nemenman.  
*Nature Communications* **6**, 8133 (2015).
- *Sloppiness and emergent theories in physics, biology, and beyond.*  
Mark K. Transtrum, Benjamin Machta, Kevin Brown, Bryan C. Daniels, Christopher R. Myers, James P. Sethna.  
*J. Chem. Phys.* **143**, 010901 (2015).
- *Efficient inference of parsimonious phenomenological models of cellular dynamics using S-systems and alternating regression.*  
Bryan C. Daniels and Ilya Nemenman.  
*PLOS ONE* **10**, e0119821 (2015).
- *Sparse code of conflict in an animal society.*  
Bryan C. Daniels, David C. Krakauer, and Jessica C. Flack.  
*Proc. Natl. Acad. Sci. USA* **109**, 14259 (2012).
- *Nucleation at the DNA supercoiling transition.*  
Bryan C. Daniels and James P. Sethna.  
*Phys. Rev. E* **83**, 041924 (2011).

- *Saturation Probabilities of Continuous-Time Sigmoidal Networks.*  
Randall D. Beer and Bryan C. Daniels.  
arXiv:1010.1714 (q-bio.NC) (2010).
- *Discontinuities at the DNA supercoiling transition.*  
Bryan C. Daniels, Scott Forth, Maxim Y. Sheinin, Michelle D. Wang, and James P. Sethna.  
Phys. Rev. E **80**, 040901 (R) (2009).
- *Statistical properties of multistep enzyme-mediated reactions.*  
Wiet H. de Ronde, Bryan C. Daniels, Andrew Mugler, Nikolai A. Sinitsyn, and Ilya Nemenman.  
IET Systems Biology **3**, 429 (2009).
- *Sloppiness, robustness, and evolvability in systems biology.*  
Bryan C. Daniels, Yan-Jiun Chen, James P. Sethna, Ryan N. Gutenkunst, and Christopher R. Myers.  
Current Opinion in Biotechnology **19**, 389 (2008).
- *Abrupt Buckling Transition Observed during the Plectoneme Formation of Individual DNA Molecules.*  
Scott Forth, Christopher Deufel, Maxim Y. Sheinin, Bryan Daniels, James P. Sethna, and Michelle D. Wang.  
Phys. Rev. Lett. **100**, 148301 (2008).
- *Absence of Kondo lattice coherence effects in  $Ce_{0.6}La_{0.4}Pb_3$ : A magnetic-field study.*  
Richard Pietri, Costel R. Rotundu, Bohdan Andraka, Bryan C. Daniels, and Kevin Ingersent.  
J. Appl. Phys. **97**, 10A510 (2005).
- *Synchronization of Coupled Rotators: Josephson Junction Ladders and the Locally-Coupled Kuramoto Model.*  
B. C. Daniels, S. T. M. Dissanayake, and B. R. Trees.  
Phys. Rev. E **67**, 026216 (2003).

#### Book chapters

- *Inferring the Logic of Collective Information Processors.*  
Bryan C. Daniels.  
In *Advances in Info-Metrics: Information and Information Processing Across Disciplines*, ed. Min Chen, J. Michael Dunn, Amos Golan, and Aman Ullah.  
Oxford University Press (2020).
- *Parameter Estimation, Sloppiness, and Model Identifiability.*  
Bryan C. Daniels, Dirk Fey, and Maciej Dobrzyński.  
In *Quantitative Biology: Theory, Computational Methods, and Models*, ed. B. Munsky, W. Hlavacek, and L. Tsimring. MIT Press (2018).

### In review

- *The basis of easy controllability in Boolean networks.*  
Enrico Borriello and Bryan C. Daniels.  
arXiv:2010.12075.
- *Innovations are disproportionately likely in the periphery of a scientific network.*  
Deryc Painter, Bryan C. Daniels, and Manfred Laubichler.
- *Emergent regularities and scaling in armed conflict data.*  
Edward D. Lee, Bryan C. Daniels, Christopher R. Myers, David C. Krakauer, and Jessica C. Flack.  
arXiv:1903.07762v2.

### In preparation

- *Distance from criticality in adaptive collective behavior.*  
Bryan C. Daniels, David C. Krakauer, and Jessica C. Flack.

---

## Professional Activities

### Meeting organization

- Feb. 2020 **Workshop: The Dynamics of Collective Decisions** *Organizer*, Wissenschaftskolleg zu Berlin (Berlin Institute for Advanced Study)
- May 2018 **Working Group: Distributed Decision Making – Universal features of decision making via collective computation** *Co-organizer*, Santa Fe Institute
- Sep. 2017 **Working Group: Quantifying Collective Behavior in Living Systems II** *Co-organizer*, Santa Fe Institute
- May 2017 **Working Group: Quantifying Collective Behavior in Living Systems** *Co-organizer*, Santa Fe Institute
- July 2014 **Working Group: Collective Cognition – Quantifying Distributed Inference** *Co-organizer*, Santa Fe Institute, (video summary here: [vimeo.com/111008805](https://vimeo.com/111008805))

### Editing

- 2020 **Theory in Biosciences** *Special issue on Quantifying Collectivity*
- 2017–2020 **PLOS ONE** *Editorial Board member*

### Committee service

- Apr. 2014 Kohler graduate fellowship selection committee member, UW–Madison

### Refereeing — Journals

- Proc. Natl. Acad. Sci. USA
- Physical Review Letters
- Proceedings B: Biological Sciences
- J. Physics A: Math. Theor.
- J. Physics: Condensed Matter
- Animal Behavior
- Frontiers in Physiology
- J. Royal Society Interface
- PLOS Computational Biology
- Physical Review E
- Physical Biology
- Journal of Complexity
- IEEE Mol. Bio. & Multi-Scale Comm.
- Bioinformatics

- Entropy
- eLife
- J. System Science & System Eng.

#### Refereeing — Grants

- National Science Foundation
- Human Frontier Science Program
- NSERC
- Israel Science Foundation

### Student Supervision

- Gaurang Singh (IIT Bombay Master's student), independent research project. Arizona State University.
- Robin Na (Seoul National University visiting undergraduate student), summer internship. Arizona State University.
- Undergraduate and graduate student workers, Digital Innovation Group and Data Mining and Informatics research teams. Arizona State University.
- Edward Lee (Princeton physics, graduate student at Cornell, now postdoc at Santa Fe Institute), summer internship and post-undergraduate research. SFI, UW–Madison.
- Jess Banks (Oberlin math, now graduate student at UC–Berkeley), summer internship. UW–Madison.

### Invited Talks

- May 2020 Emory University. Theory and Modeling of Living Systems. Virtual workshop: "Can machine learning learn new physics, or do we need to put it in by hand?"
- Jan. 2020 University of Muenster. Muenster Graduate School of Evolution. Lecture series: "The Growth of the Evolutionary Thought."
- Jan. 2020 Max Planck Research Group Leader Symposium, Berlin.
- June 2019 Santa Fe Institute. CollectiveCrypto workshop: Exploring the Role of Collective Effects in Cryptonetwork & Token Design.
- Mar. 2019 Santa Fe Institute. SFI Studio event on Complexity for Intelligence Science.
- June 2018 Santa Fe Institute. Workshop on Limits of Human Performance: The Role of Collective Effects in Individual and Team Performance.
- Feb. 2018 University of Arizona. Applied Mathematics Colloquium.
- Mar. 2017 APS March Meeting. Invited session: Robot scientists and machine learning for automated modeling and control of complex systems (DBIO/GSNP).
- Dec. 2016 Los Alamos National Laboratory. Center for Nonlinear Studies.
- July 2016 Vanderbilt University. Selected for contributed talk at q-bio conference.
- Oct. 2015 Santa Fe Institute. Working group on Information Theory, Ecosystems, and Schrödinger's Paradox.
- June 2015 Champalimaud Neuroscience Programme, Lisbon, Portugal. Polavieja lab.
- Nov. 2014 University of Michigan. Center for the Study of Complex Systems Seminar.
- Oct. 2014 American University. Recent Innovations in Info-Metrics.

- May 2014 Santa Fe Institute. Workshop on Statistical Mechanics.
- Apr. 2014 University of Wisconsin–Madison. Chaos and Complex Systems Seminar.
- Jan. 2014 Georgia Tech. Selected for contributed talk at Dynamics Days conference.
- Dec. 2013 University of Wisconsin–Madison. SILO (Systems, Information, Learning, and Optimization) lecture.
- Oct. 2013 University of Wisconsin–Madison. SoundWaves public lecture.

---

## Teaching Experience

- 2016–2018, 2020 **Anthropology/Biology/Sustainability 570: Fundamentals of Complex Adaptive System Science**, Arizona State University  
Co-taught with Manfred Laubichler and Michael Barton
- 2013–2014 **Genetics 677: Evolutionary Systems Biology**, University of Wisconsin–Madison  
Co-taught with evolutionary biologist Laurence Loewe. Curriculum development and lectures on nonlinear dynamics in systems biology for an interdisciplinary undergraduate and graduate student audience.
- 2014 **Biochemistry 609: Mathematical Methods for Systems Biology** *Guest lecturer*, University of Wisconsin–Madison
- 2013 **Humanities Hackathon short course**, University of Wisconsin–Madison  
Course development, workshop organization, and lectures on computational analysis techniques for a professional humanities audience.
- 2007–2009 **Physics Teaching assistant**, Cornell University
- Physics 218: Waves and Thermodynamics
  - Physics 317: Applications of Quantum Mechanics
  - Physics 2206: Weapons of Mass Destruction
  - Physics 1101: General Physics Autotutorial

---

## Community Outreach

- 2009–present **Adopt-a-Physicist volunteer**  
Online interaction with high school physics students
- 2020 **Neuromatch Academy**  
Acted as faculty mentor for online school in computational neuroscience
- 2014–2015 **High school field trip outreach events**  
Led a group of postdocs and graduate and undergraduate students to develop activities that demonstrate computational reasoning, complex systems research, and interdisciplinary science for a high school audience
- 2010–2011 **Service Learning Mentor, The Masters Program**  
One-on-one and group mentorship with high school students
- 2008–2010 **Expanding Your Horizons volunteer**  
Physics demonstrations for middle school girls
