

**ENG 414 - HW #1**

**due 31 August**

Select a language that you will be working on. This should be a lesser known/studied language. You can find such a language by going on the ethnologue website: <https://www.ethnologue.com/browse/names>. Ethnologue also has a list of languages that are NOT lesser known, so ones to avoid:

<https://www.ethnologue.com/statistics/size>

Then, explain why you picked it (e.g. level of difficulty, interest in the culture), define it genetically (which linguistic family it is part of and if it has close sister languages) and areally (where it is spoken). List the grammars/texts that you could find. Tell me how you found these references (google scholar...).

HWs need to be handed in, on paper.
