

## 2.1 The Language of Sets

①  $A = \{0, 1, 2, 3, 4, 5, 6, 7, 8, 9\}$

$A = \{x : x \text{ is a digit}\}$

②  $B = \{x : x \text{ is a funny movie}\}$

This is not well defined since it is unclear  
as to what "funny" means.

④  $A = \{\text{football, baseball, hat, foot, shoe}\}$

$n(A) = 5$

⑩  $S = \{-4, -3, -2, -1, 0, 1, 2, 3, 4\}$

⑫  $L = \{7, 9, 11, 13, 15, 17, 19\}$

⑯  $P = \emptyset$

⑮  $5 \in \{y : y \text{ is a rational number}\}$

⑰  $0 \notin \emptyset$

⑯  $n(A) = 6$

⑯  $n(A) = 5$

⑯ 4.6  $\in A$  but 4.6  $\notin B$

⑯ snake  $\in A$  but snake  $\notin B$

⑯  $H = \{x : x \text{ is a Humanities class}\}$

⑯  $C = \{\text{History 012, English 010, English 220, Psychology 200}\}$

## 2.2 Comparing Sets

15. ~~Every elt in set A is also in set B.~~ True.  
17. False. To be a proper subset of B, must contain at least one elt not in A.

28.  $n(T) = 8 \quad \therefore$  these sets are not equivalent  
 $n(R) = 6$

31.  $n(A) = 8 \quad \therefore$  these sets are equivalent  
 $n(B) = 8$

30.  $\{1, 2\}$     $\{2, 3\}$     $\{3, 4\}$   
 $\{1, 3\}$     $\{2, 4\}$   
 $\{1, 4\}$

45.  $2^7 = 128$

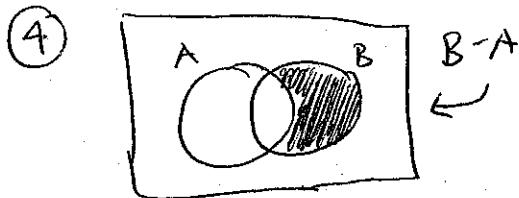

47.  $2^8 = 256$

## 2.3 Set Operations

①  $A \cup B = \{x : x \in A \text{ or } x \in B \text{ (or both)}\}$

②  $A \cap B = \{x : x \in A \text{ and } x \in B\}$

③  $A'$  is the set consisting of all elements that exist in the universal set, but not in  $A$ .

⑨  $A \cap B = \{1, 3, 5\}$

⑩  $A \cup B = \{1, 2, 3, 4, 5, 6, 7, 9\}$

⑪  $B \cup C = \{1, 2, 3, 4, 5, 6, 7, 8\}$

⑫  $B \cap C = \{2, 4, 6\}$

⑬  $A \cup \emptyset = A$

⑭  $A \cap \emptyset = \emptyset$

⑮  $A \cup U = U$

⑯  $A \cap U = A$

⑰  $A \cap (B \cup C) = \{1, 3, 5, 7\}$

⑱  $A' = \{2, 4, 6, 8, 10\}$

$C' = \{1, 3, 5, 9, 10\}$

$B \cup C' = \{1, 2, 3, 4, 5, 6, 9, 10\}$

$\therefore A' \cap (B \cup C') = \{2, 4, 6, 10\}$

$$\textcircled{35} \quad B - A$$

$$\textcircled{36} \quad (A - B) \cup (B - A)$$

$$\textcircled{37} \quad (A \cup B)'$$

$$\textcircled{38} \quad ((A - B) \cup (B - A))$$

$$\textcircled{39} \quad A \cap B \cap C$$

$$\textcircled{40} \quad (A \cap B) \cup (A \cap C)$$

$$\textcircled{41} \quad (A \cup C) - B$$

$$\textcircled{42} \quad (A \cup B \cup C) - (A \cap B \cap C)$$

$$\textcircled{43} \quad n(A) = 6 + 4 + 11 + 9 = 30$$

$$\textcircled{44} \quad n(A \cup B) = 6 + 4 + 11 + 9 + 7 + 13 = \cancel{45} 50$$

$$\textcircled{45} \quad n(C') = 5 + 6 + 4 + 13 = 28$$

$$\textcircled{46} \quad n(A - C) = 6 + 4 = 10$$

$$\textcircled{47} \quad n(A \cap C) = 9 + 11 = 20$$

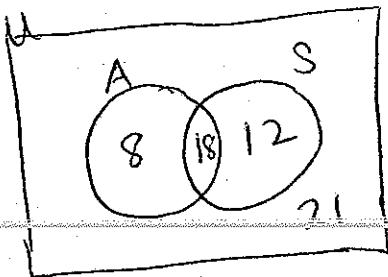

$$\textcircled{48} \quad n(A \cap B \cap C) = 11$$

$$\textcircled{49} \quad n((A \cup B) \cap C) = 9 + 11 + 7 = 27$$

$$\textcircled{50} \quad n((A \cup C) - (B \cup C)) = 6$$

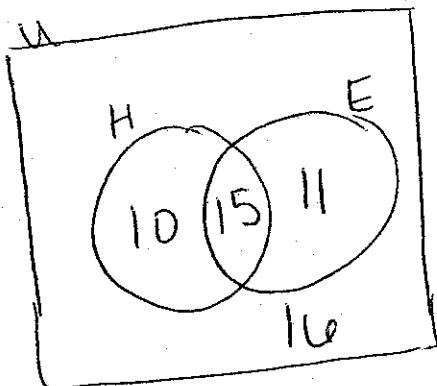

## 2.4 Survey Problems

(33)

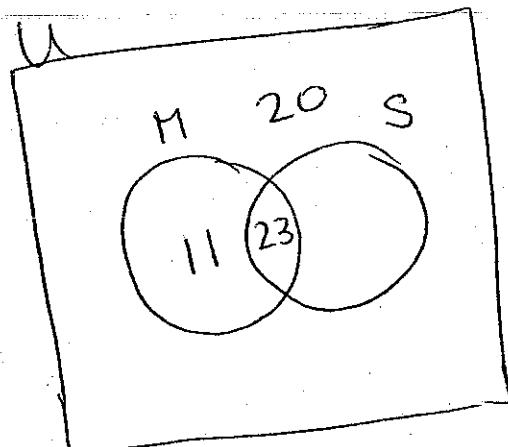

59

(34)

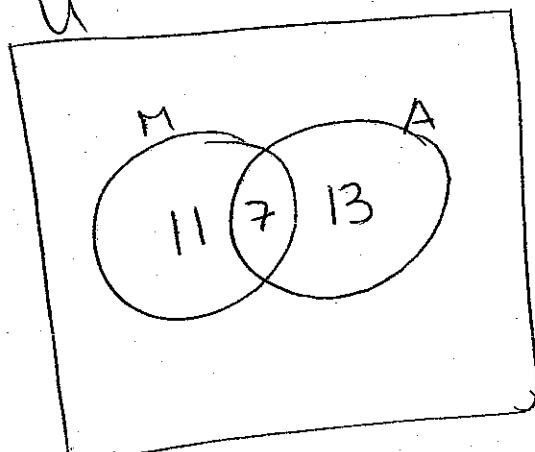

26

(35)

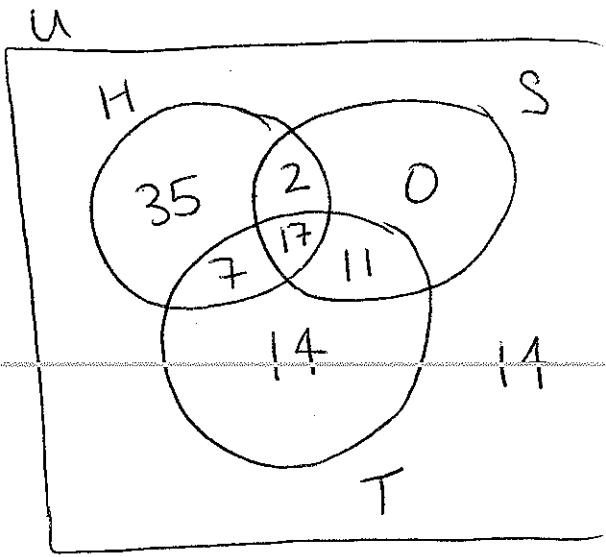

$$82 - (20 + 23 + 11) = 28$$

(36)

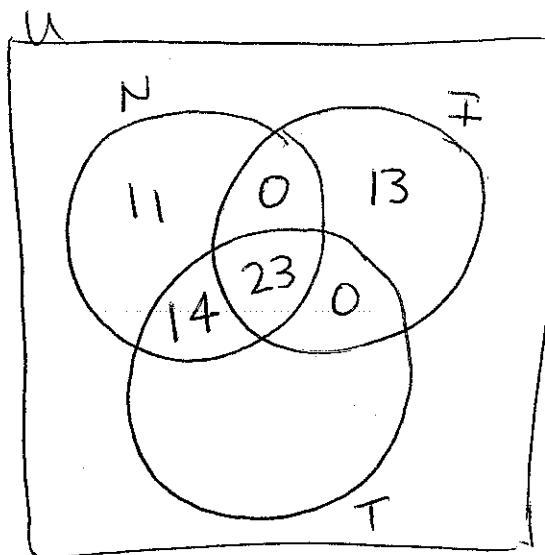

$$95 - (11 + 7 + 13) = 64$$

37

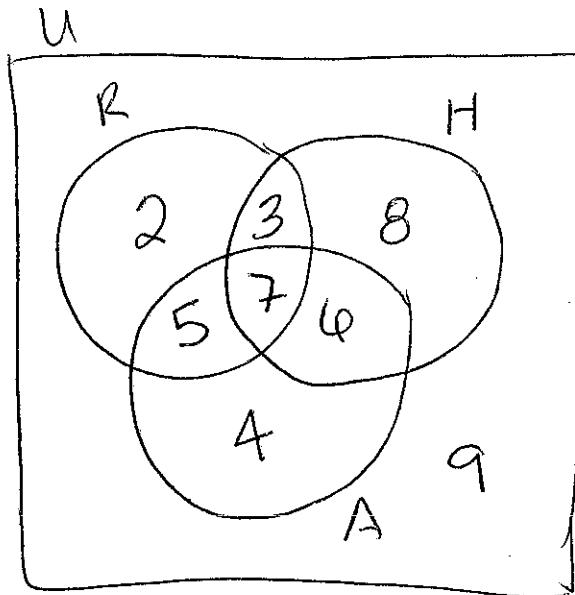

30 attended the BBQ.  
49 purchased tour guide
