

## Your Dream Machine

For this assignment, I want you to describe your dream computer. Assume you have been given a limitless budget to purchase a new computer, and all the upgrades, software programs, and accessories you would want. You must include your new computer's-

- Make and model (for instance, this is the Aspire Predator from Acer)
- System Specifics (RAM, storage capacity, display, graphics, wireless, any other features offered that you may want to upgrade)
- Software (OS and application software)
- Accessories
- And finally, discuss the technology of the processor chip that would power your computer.

For example, if you specified a new Mac Pro, after listing which system and what you would want to put in it, you would discuss the particular chip that powers it (perhaps the Quad- Core Intel Xeon "Woodcrest" processors). Or you might pick a Dell computer powered by an AMD Athlon™ 64 X2 dual core. Tell me about your specific processor(s), and it's speed (in Hz).

*Please format your paper correctly, spell check, and include your last name in the title of the document (without any special characters such as #). While there is no length requirement to this assignment, I would expect it to be around 2 pages. Please use a size 12 font and double space.*

**Submit a PDF file to the digital drop box by midnight, Sunday 2/22/09.**
